

How to use the DGX Soft Handmount (Page 1)

This is a diagram indicating how the HOOK and LOOP parts are sewn to the strap.

In this first picture, the Velcro strap runs across the palm.

In this second picture, the Velcro strap is threaded through the half-circle, plastic loop. HOOK (B) will be facing up, away from the palm.

In this third picture, the Velcro strap is threaded back across the palm through the black, plastic belt slide. HOOK (A) will be facing up, away from the palm.

In this fourth picture, the Velcro strap is once again threaded back across the palm, securing LOOP (A) to HOOK (A).

How to use the DGX Soft Handmount (Page 2)

In this first picture, the Velcro strap that secures the light is closed.

In this second picture, the Velcro strap that secures the light is open. There are two grip pads that prevent the light from slipping out.

In this third picture, the light is placed between the two grip pads. The Velcro strap is threaded through the black, plastic belt slide.

In this fourth picture, the Velcro strap is threaded back, securing the hook and loop parts
